Go K-Botics

Maria Offin- Kingston this Week

Posted -18 second ago

K-Botics members demonstrated last year's robot during at KCVI to mark the beginning of this year's build season, that followed a NASA broadcast unveiling the 2012 FIRST Robotics Challenge on Saturday, Jan. 7. Each year, a series of regional and international competitions are held to provide students with an opportunity complete a real world engineering project. Students are given a budget and a six-week time frame to build a robot that will participate in a tournament-style competition. KCVI's K-Botics team made it to last year's World Championship in St. Louis MO.
